# BRACKET WITH BACKBOARD

English  
version

Compatible with all LIFEPAK® and SAMARITAN® products

Rotaid Bracket

# Product sheet

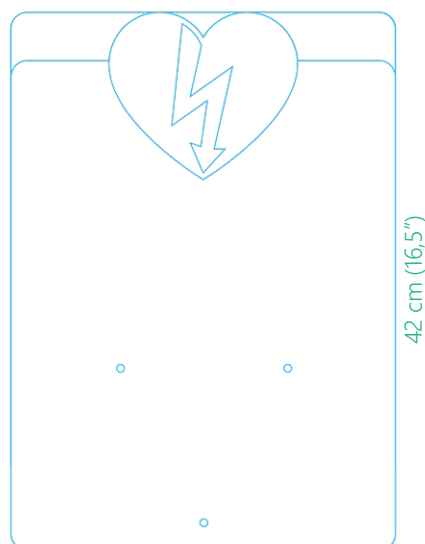

The Rotaid bracket is a highly robust and durable wall bracket that ensures a simple, visible and high-quality storage of your AED in an indoor environment. Made from stainless steel and coated in a white finish, the bracket allows your AED to be quickly grabbed in case of an emergency. The optional custom-made backplate provides signage and responder guidance and makes sure your AED is quickly found.

## Customizable backboard

Made from sturdy Dibond material, and printed with UV-protected paint, the backboard allows for a long-lasting appearance and signage.

A valuable tool for instructing bystanders, creating awareness, thank a sponsor or promote your brand. Our inhouse marketing team designs the backboard to your specific needs and (customer) requirements.

30 cm (11,8")

42 cm (16,5")

## Rotaid Bracket

# Spec sheet
